Taylor Fresh Foods Statement Regarding Cyclospora Outbreak

Dear Valued Customer,

Based on information provided yesterday by the FDA, Taylor Farms de Mexico is voluntarily removing all iceberg lettuce sourced from central Mexico from the U.S. market.

While the FDA traceback is indicating a specific independent farm, which represents less than 1% of the U.S.'s iceberg lettuce supply, as the potential source of the outbreak, we have removed all iceberg lettuce from the region indefinitely.

No other Taylor Fresh Foods products across the country are impacted.

No Taylor Farms branded salad kits contain iceberg lettuce.

As a family owned and operated company, we are deeply concerned for those who became ill, their families, and the many Americans whose trust in the safety of their fresh produce has been shaken. That trust is something we've worked for decades to earn, and we are committed to doing everything in our power to restore that confidence.

We will provide continuous updates as new information emerges.

Kind regards,

Taylor Farms
