

July 19, 2026

Dear Valued Customer,

We are terminating this recall, effective immediately, and there is no need to continue withdrawing, destroying, or holding the product lots previously communicated to you. You may resume normal handling of that product.

FDA communicated to us yesterday that FDA had a confirmed result. Today, FDA notified us that it was a false positive and apologized for their error.

Here is a copy of the update below from FDA:

*Due to the complexity in detection of Cyclospora, FDA laboratory experts re-reviewed the sample results and have concluded that the finding does not represent true amplification and should be considered a false positive. FDA will be updating its webposting later today to make this clear. Pending the FDA laboratory analytical final results, the status may be updated to Release the entry line.*

Based on this information we have notified FDA and USDA that we are terminating the recall. We appreciate your continued support and patience as we navigate through this issue. If you have any questions, please do not hesitate to contact your direct Taylor Farms representative.

Sincerely,

Taylor Farms
